

AI × CLOUD × CONSULTING

Company Deck

Redesign enterprise work with AI and cloud.

| Trustray LLC — Godo Kaisha Trustray

🚀 End-to-end, concept to operations

About Trustray LLC

Redesign enterprise work with AI and cloud.

Trustray LLC is a technology company focused on AI, cloud, and consulting. We help companies clarify business issues and support the full path from AI strategy to system development, cloud foundations, and operational improvement.

AI SOLUTIONS

Generative AI & AI agent development

Design and build AI systems for company-specific work using generative AI, RAG, and AI agents.

CLOUD & SECURITY

Cloud & security foundations

Build foundations on AWS, Google Cloud, and Alibaba Cloud to run AI securely and reliably.

CONSULTING

AI & DX consulting

Clarify work and issues, then design where AI fits and how it should be built.

Do any of these sound familiar?

You have the information and know-how in-house, yet AI is not turning into business results.

Internal information is hard to find

Documents, manuals, FAQs, and meeting notes are scattered, so the right information is hard to reach.

Routine work eats up time

Research, document creation, data entry, and inquiries are still handled manually.

Development cannot keep up

Design, implementation, testing, and review depend on individuals, so delivery lags.

Operations are overloaded

Monitoring, log analysis, and incident response consume the team, leaving no room to improve.

Unclear where to start with AI

Benefits and risks are hard to see, so projects stall at the PoC stage.

AI does not get adopted

The tool is introduced but never fits the workflow, so it goes unused.

✓ **Trustray supports you end to end—from clarifying issues to design, development, and operations—so AI is never just "installed and forgotten."**

Turn AI into systems people can actually use.

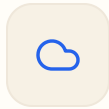

We go beyond adding tools—we understand your workflows and issues and build systems that can be adopted, operated, and improved over time.

AI SOLUTIONS

Generative AI & AI agent development

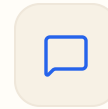

Design and build AI systems tailored to company-specific operations using generative AI, RAG, and AI agents.

CLOUD & SECURITY

Cloud & security foundations

Design and build secure, reliable cloud foundations for AI operations using AWS, Google Cloud, and Alibaba Cloud.

CONSULTING

AI & DX consulting

Clarify business issues, decide where AI should be introduced, and design the right architecture and operating model.

Consulting grounded in systems we can actually build.

AI adoption, from concept to implementation.

We support strategy, AI system development, agentic engineering, and cloud security foundations.

AI CONSULTING

01

AI adoption consulting

From clarifying issues to a feasible adoption plan.

AI assessment Workflow analysis Adoption roadmap PoC design Risk review

AI SOLUTIONS

02

AI system & AI agent development

Design and build AI systems around your work and data.

Internal AI chat RAG & knowledge search AI agents Docs & support System integration

AGENTIC ENGINEERING

03

Agentic Workflow, Coding & Ops design

Build processes where people and AI collaborate safely.

Agentic Workflow Agentic Coding AgenticOps Multi-agent design Human-in-the-loop

CLOUD & SECURITY

04

Cloud & security infrastructure

Design and build foundations for secure, reliable operations.

AWS & Google Cloud Alibaba Cloud Kubernetes & containers Terraform & CI/CD
Monitoring & security

Solve business problems with AI.

We embed AI agents into knowledge use, workflow automation, software development, and IT operations.

01

KNOWLEDGE

Find internal knowledge fast

Build RAG-based AI search across documents, manuals, FAQs, and meeting notes.

RAG / Internal AI chat / Knowledge search

02

WORKFLOW

Automate routine work

Add AI agents to research, document creation, data entry, inquiries, and approvals.

Agentic Workflow / Automation / Human-in-the-loop

03

DEVELOPMENT

Strengthen engineering with AI

Apply AI to requirements, design, implementation, testing, and review to raise speed and quality.

Agentic Coding / AI code review / Test automation

04

IT OPERATIONS

Modernize IT operations

Support monitoring, log analysis, root-cause work, and incident response with AI to reduce load.

AgenticOps / Log analysis / Incident response

End-to-end support, from concept to operations

We do not stop at proposals. One team supports you from clarifying issues through design, development, cloud implementation, and operational improvement.

01

CONSULTING

AI adoption consulting

Issue discovery, opportunity research, tool selection, PoC design, ROI, and risk review.

02

AI DEVELOPMENT

AI system & agent development

Build knowledge search, chatbots, document generation, workflow automation, and AI agents.

03

CLOUD & SECURITY

Cloud & security implementation

AWS, Google Cloud, Alibaba Cloud, Kubernetes, Terraform, CI/CD, monitoring, and protection.

04

OPERATIONS

Continuous improvement & operations

Maintenance, AI accuracy and prompt improvement, cost optimization, feature additions, and adoption.

Discovery

Design

Build

Cloud

Operations

✓ We connect everything from discovery to operations in one flow, turning AI into continuous results.

Why Trustay

Our strength is supporting you with a technical understanding of both strategy and implementation. We never treat AI as just "installed and done."

01

We understand the business, not only AI

We start from business issues and goals, then design the systems that are actually needed.

02

Consulting through development in one team

We support requirements, design, development, cloud implementation, and operations end to end.

03

Strong in cloud and security

We build foundations with scalability, availability, data protection, and access management in mind.

04

Enterprise-grade technical depth

We bring experience in AI, cloud, security, distributed systems, and project management.

Technologies & domains

We work across AI, cloud, and security to implement enterprise systems.

Company

Trustray LLC is a technology company focused on AI, cloud, and consulting. We help companies clarify business issues and support the full path from AI strategy to system development, cloud foundations, and operational improvement.

Company name	Trustray LLC
Legal name in Japan	Godo Kaisha Trustray
Business	AI adoption consulting / AI system development / Cloud infrastructure / Operational improvement
Focus areas	Generative AI & AI agents / Cloud / Security / Distributed systems / Business application development

CONTACT

Turn AI into business results.

You can talk to us even if you are not sure where AI should start. We clarify your current issues and propose a realistic way to adopt it.
